

Optima Leaf-K

Rezultatai su Optima Leaf-K

Efficacy of Optima Vigor+ in carrot

Trial design:

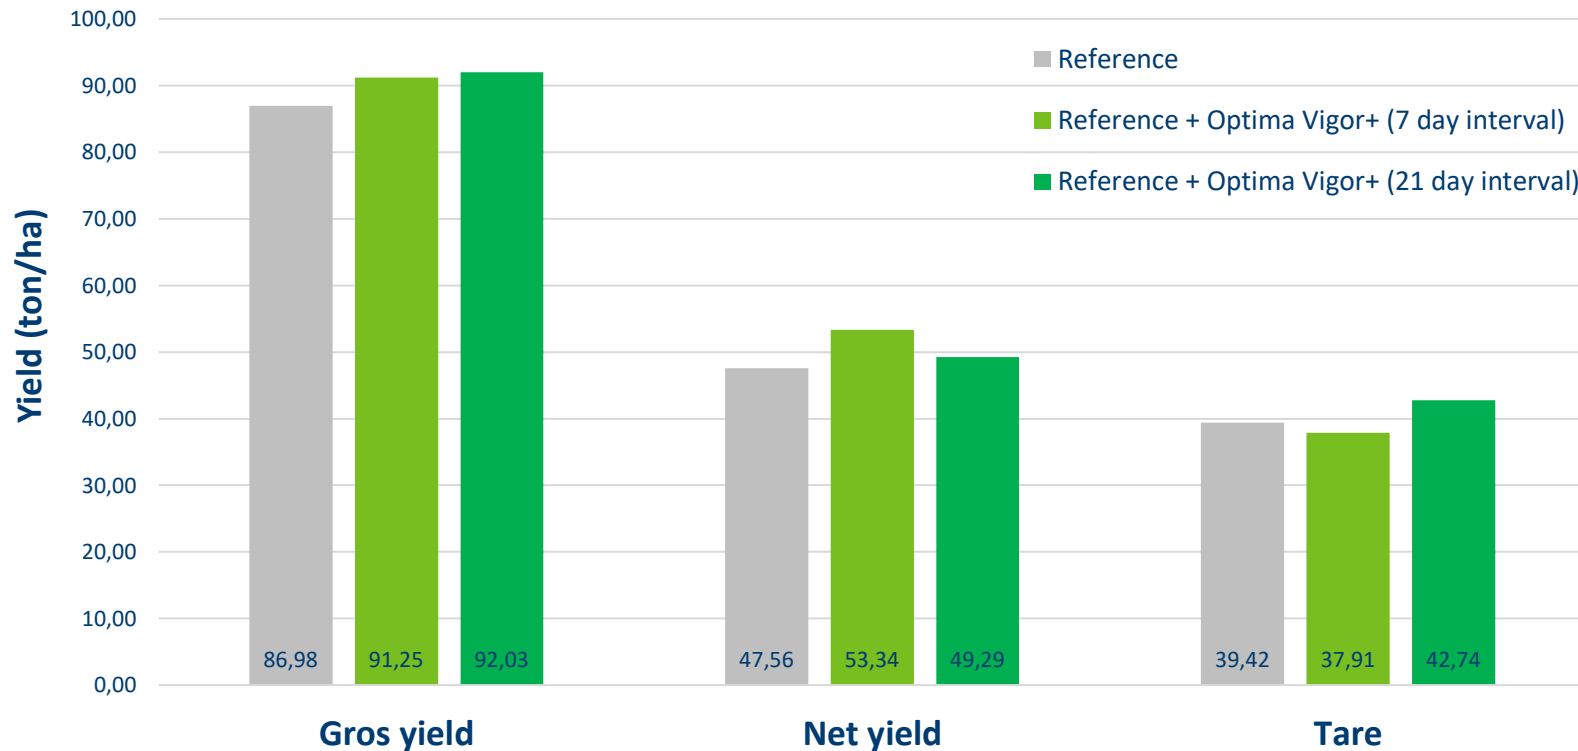

- Aim:** Demonstrate the efficacy of Optima Vigor+ in carrot
- Trial station:** AIKC Rusthoeve
- Location:** Colijnsplaat, The Netherlands
- Season:** Summer 2020
- Objects:** 5x Optima Vigor+ @ 3 l/h – 7 day interval (first application in week 32)
5x Optima Vigor+ @ 3 l/h – 21 days interval (first application in week 32)
- Reference:** Practical reference without foliar fertilizers

Efficacy of Optima Vigor+ in carrot

Results:

5 applications of 3 l/ha Optima Vigor+ at an interval of 7 or 21 days results in an gross and net yield increase.

Efficacy of Optima Leaf-K in carrot

Trial design:

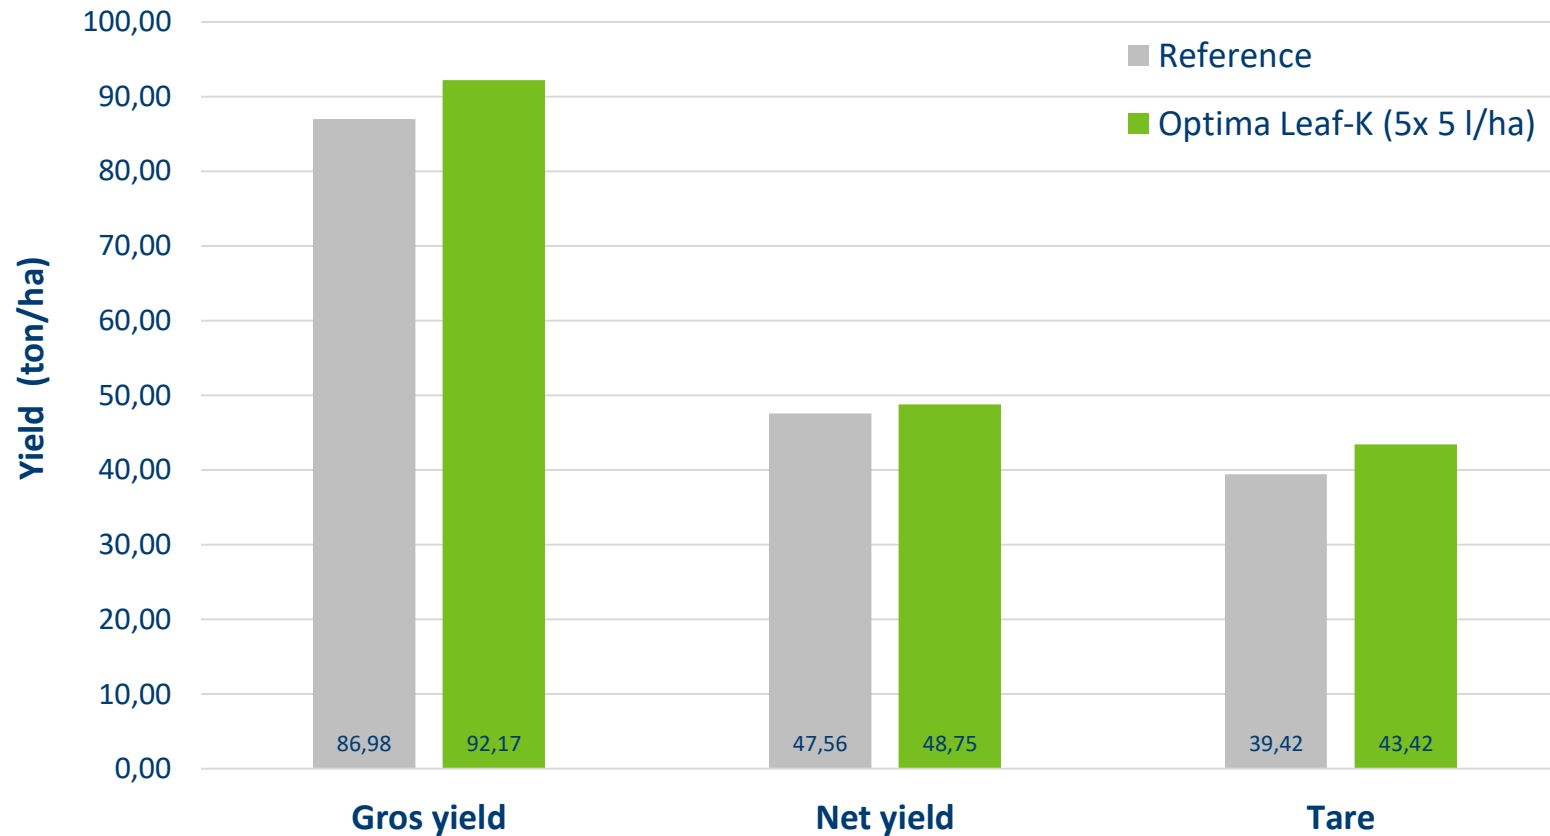

- Aim:** Demonstrate the efficacy of Optima Leaf-K in carrot
- Trial station:** AIKC Rusthoeve
- Location:** Colijnsplaat, The Netherlands
- Season:** Summer 2020
- Object:** 5 applications of Optima Leaf-K @ 5 l/h
(7 day interval; start at growing of the carrot)
- Reference:** Practical reference without foliar fertilizers

Efficacy of Optima Leaf-K in carrot

Results:

5 applications of 5 l/ha Optima Leaf-K resulted in a net increased yield of +2,5% and a gross increased yield of + 6,0%.
